

SEATO MEDICAL RESEARCH PROJECTS IN NEUROLOGY

Coordinator: Martin Chipman, Major, MC.

Principal Investigators: Martin Chipman, Major, MC.
Francis C. Cadigan, Major, MC.
Wisit Benjapongse, MD.¹
Natth Bhamarapravati, MD.²

Associate Investigators: Edward H. Johnston, Lt. Colonel, MC.
Sira Bunjaratavej, MD.³
Majuree Balankura, Lt. Colonel, MC., R.T.A.⁴

Assistant Investigator: Boonarb Panpanya.

Period of Report: 1 May 1965-31 March 1966

General: The information for the family reports of degenerative neurological disease in Thailand was compiled both in Bangkok and at Phrabuddhabat Hospital. The study reports are listed under the following titles:

"Early Juvenile Cerebral Lipoidosis and its Occurrence in a Thai Family".

"A Clinical Study of Hereditary-Familial Spino-Cerebellar Degeneration in a Thai Family".

During the past year the major project emphasis has been on malaria and its effects on the nervous system. The projects in malaria have been done at Phrabuddhabat Hospital, Saraburi Province, in co-operation with the Director and staff of Phrabuddhabat Hospital. The following study reports are listed under the SEATO Medical Research Project in malaria.

"Malaria and the Nervous System. Clinical Experience with a Hospital Population in an Endemic Area in Thailand".

"Malaria and the Nervous System. Ammonia Levels in Blood and Spinal Fluid in Cerebral Malaria and Malarial Hepatitis"

Mannitol-Its Use in Treating Increased Spinal Fluid Pressure.

1. Physician, Phrabuddhabat Hospital, Saraburi Province.
2. Associate Professor of Pathology, Siriraj Hospital, Bangkok.
3. Neurosurgeon, Siriraj Hospital, Bangkok.
4. Chief of Pediatrics, Royal Thai Army Hospital.
