

SEATO Medical Research Renal Studies

Coordinator: Craig J. Canfield, Maj, MC, Ch. Med Serv

Principal Investigators: Rachit Buri, M.D.\*  
Craig J. Canfield, Maj. MC  
Channivat Kashemsant, M.D.\*  
Pensri Makaranond, M.D.

Associate Investigators: Chanyo Benyajati, M.D.\*\*  
Natth Bhamarapravati, M.D.\*  
Billy W. Evans, Maj. MSC  
Chaiyan Kamparnart-Sanyakorn, M.D.  
Louis H. Miller, Capt, MC  
Sangchan Sangvichien, M.D.  
Visith Sitprijia, M.D.\*\*  
Philip Z. Sobocinski, Capt. MSC  
Chajchawal Suebsanguan, M.D.\*\*\*  
Aree Valyasevi, M.D.

General Information: During the first year of research in the renal field, the major emphasis was on establishing standards for future studies. Preliminary data indicate no major deviation from Western standards in the renal function studies thus far evaluated. Body space measurement, however, reflect the leaner body mass of the Thai people. Recently, emphasis has been on renal function in malaria. Studies are continuing on other renal diseases including primarily nephrotic syndrome.
