

SEATO MEDICAL RESEARCH STUDIES ON LEPTOSPIROSIS

Coordinator : Paul C. Smith, MAJ, VC, Asst Chief; Department of Veterinary Medicine

Principal Investigators : Chua Wongsongsarn, D.V.M.*
Paul C. Smith, MAJ, VC
Jack S. Stanton, MAJ, VC

Assistant Investigators : Dilok Kasornsombat, D.V.M.**
Preecha Klainil, D.V.M.**
Jack M. Preston, SP5

Period of Report : 1 April 1967—31 March 1968

General Information

This is the final report of studies on leptospirosis. The contract with the Department of Livestock Development expired 30 June 1967 and has not been renewed. The department has stated that it will maintain a leptospirosis diagnostic laboratory using the techniques acquired during this study. During this period there were no leptospiral isolations made and the number of sera tested was smaller than usual. The percentage of sera containing leptospiral agglutinins was comparable to previous reports.
